Pet Suggestions

Pets can use the same products as humans as they are mammals too. Below are some guidelines. You can place the amount suggested on their food or on the top of their foot or near their mouth for them to lick off. If your pet has a skin issue, place the amount on their skin. It will help with the skin issue and they can lick it off as well.

We recommend pulling out their bottom lip and putting the drops in front of the teeth for dogs, or dropping it on top of the front paw for cats so they lick it off. You can also drop it onto their food as long as they eat all of their food at one time. Another tip is to drop it onto their favorite treat.

- NuLeaf Pet Recommendation taken 2 x day (morning and night)
 - Estimations for Pet Weight Usage 2 drops per 20lbs of your pet.
 - Note about cats... they metabolize differently than dogs. Most will only need 1 drop 2 x a day.
- Artistic Organics Pet Recommendation using the 350mg CBD Oil
 - 1 drop for 5 lbs, 2 x a day (morning and night)
- Artistic Organics Oil, using the 700mg CBD Oil
 - 1 drop for 10 lbs, 2 x a day (morning and night)
- Endo Pet Oil 1000mg CBD
 - 1 drop for 15 lbs, 2 x a day (morning and night)
- Tips for **Cats**
 - Start with ½ of the suggested amount for a few days. Then increase by 1 drop every 3 days until your cat feels better.
 - Note about cats... they metabolize differently than dogs. Please keep their dosage low until you know their reaction.
- Tips for **Dogs**
 - Start with ½ of the daily suggested amount for a few days. Then add 1 drop per day until you notice your pet feeling better.

Additional Note: This dosage is a rough estimation of what your pet will need. It can take several days to become effective. Please start with 1/2 the recommended dosage and add one extra drop every 3 days until you notice a change. After finding the dosage that works for your pet feel free to adjust up or down depending upon the situation (A vet trip or a car ride may require more)
